FUJI ELECTRIC

MANUAL MOTOR STARTERS
MAGNETIC CONTACTORS

DUO SERIES

USEH530b

Advanced Motor Protection and Control – Fuji DUO series

Fuji's new motor control system for the international market.

The DUO series adds a new family of compact, high-performance combination starters to manual motor starters BM3 series, magnetic contactors SC-M and SC-E series and thermal overload relays TK-E series to form a complete line-up of motor control products.

Responding to today's market needs, Fuji DUO series was designed to provide various distinctive features.

ULTIMATE COST SAVING SOLUTION

- The number of components like Circuit Breakers can be reduced. (See page 4 to 7 for detail.)
- Combination starters combined with manual motor starters and contactors, provides 52% reduction for monting space and 90% reduction for wiring work to make a control panel.

RESPONSE TO THE INTERNATIONAL MARKET

- Short-circuit protective coordination between protective devices and the equipment to be protected.
- Conformance to UL including Type E, Type F, CSA, IEC and other international standards.

SAFETY AND ECOLOGICAL CONSIDERATION

- Application of international standards in safety features such as terminals with finger protection.
- Use of recycled materials to help conserve the environment and save resources.

FUJI meets emerging needs with a new form of motor protection.

DUO SERIES

Manual motor starters (MMS)

BM3 series

Manual Motor Starters that provide optimal protection by integrating the functions of a molded case circuit breaker and thermal overload relay into a highly compact unit.

Rated current: 0.16 to 32A, 10 to 63A
Short circuit current rating : 22, 50kA 480VAC
Width: 45mm, 55mm

Contactors and thermal overload relays

SC-M series

Compact magnetic contactors and small capacity motor control for 3 to 5HP, 480VAC.

Rated capacity: AC-3 3 to 5HP, 480VAC
Width: 45mm

SC-E series **TK-E series**

Magnetic contactors and thermal overload relays featuring terminals with finger protection for 5 to 100HP.

Rated capacity: AC-3 5 to 100HP
Width: 43,54,67mm (5 to 50HP)
88,100,115mm (60 to 100HP)

Combination starters

Provide the ability to configure combination starters for compact, reliable motor protection by combining a manual motor starter and a magnetic contactor.

Manual motor starters BM3 series

Conforming to international standards and combining compactness with high breaking performance, this versatile series features leading-edge motor protection.

Molded case circuit breaker and thermal overload relay functions integrated into a highly compact unit.

Circuit breaker functions

- Short-circuit protection
- Overcurrent protection
- Line protection

Thermal overload relay functions

- Overload protection
- Phase-loss protection
- Rated current adjustment
- Ambient temperature compensation

Manual motor starter advantages

Compactness	Mounting space: MCCB + Thermal overload relay: 100% MMS: **43%** (**57%** reduction)
Reduction in wiring work	MCCB + Contactor + Thermal overload relay: 100% MMS + Contactor: **50%** (**50%** reduction)
Standards	• IEC 60947-1, 60947-2, 60947-4-1, UL 508, CSA C22.2 No.14
Approved	• cUL (File No. E163944, E211710), TÜV (R205062B)
Ecological design	• Recyclable thermoplastic resin used in plastic parts • Indication of materials used • Cadmium-free contacts

Magnetic contactors SC-M and SC-E series

A full line-up consisting of the mini-contactor SC-M series for 3 to 5HP, 480VAC use and the SC-E series for 5 to 100HP 480VAC use.

- Finger protection standard
- Lug terminal

SC-M series

SC-M01, M02

SC-E series

SC-E02 to E05

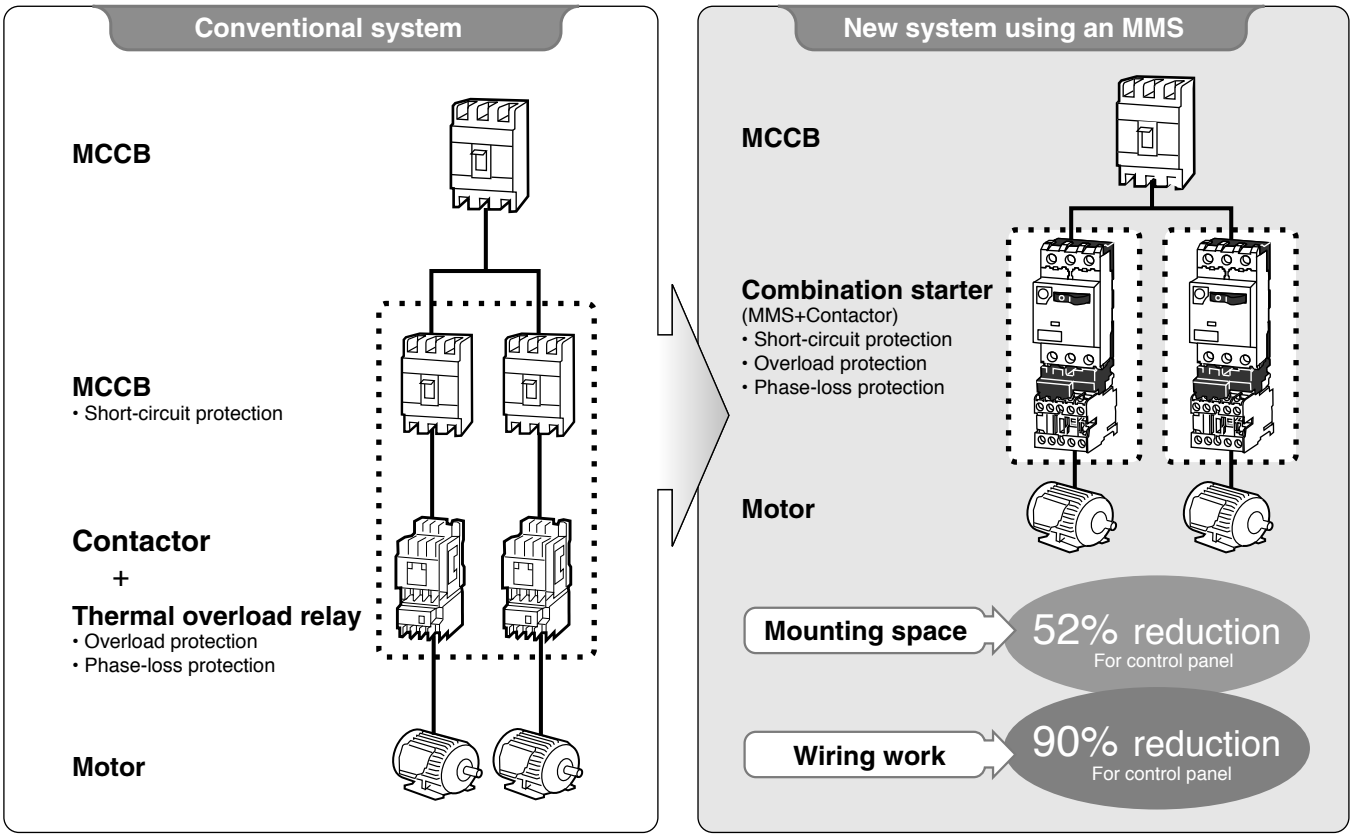
SC-E1 to E2S

SC-E3, E4

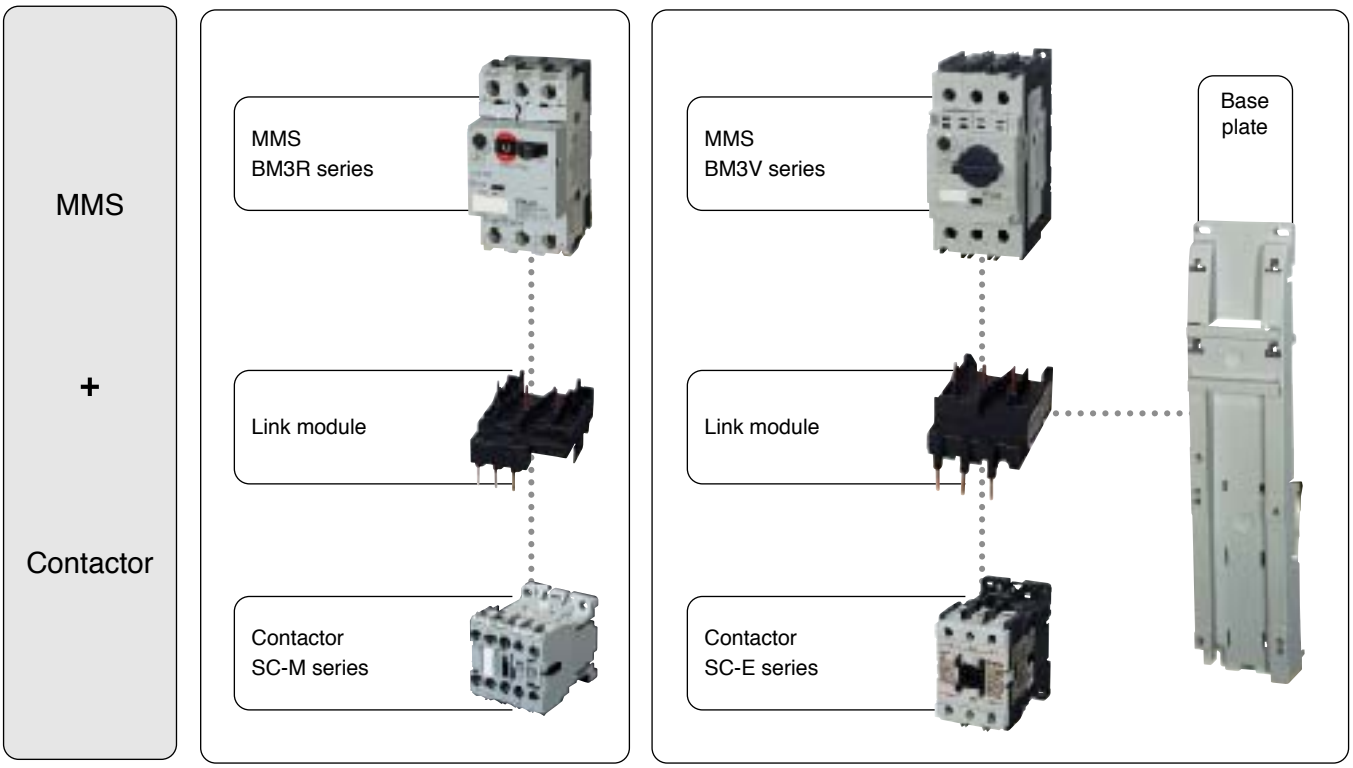
Combination of manual motor starters and magnetic contactors

A line-up that aims to set a new world standard for compactness, high performance, and utility in combination starters.

Space-saving, reliable motor protection achieved by combining a manual motor starter and magnetic contactor.



Combination starters can be easily configured with a manual motor starter, magnetic contactor and other parts.



Fuji proposes ultimate cost saving solution with DUO series

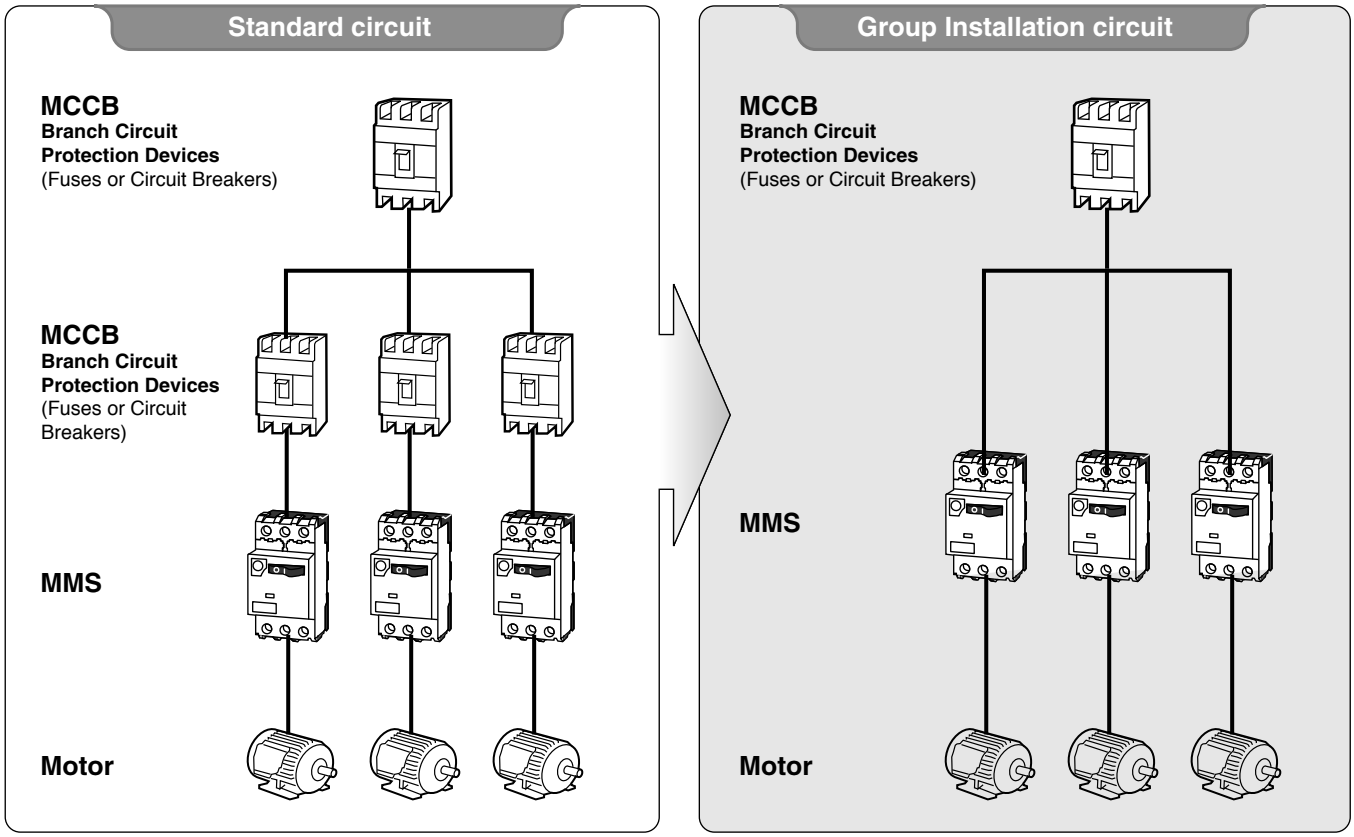
Fuji Manual Motor Starter (MMS) intends to apply for manual motor starting application.
As UL listed manual motor controller per UL508, they provide overload protection but are required to be installed with short circuit protection devices (Fuses or Circuit Breakers) on the upstream.
However, according to National Electrical Code (NEC), you can save the cost of short circuit protection devices and can make a smaller panel using DUO series.
The following are case studies for the cost saving use of Fuji DUO series.

Case study 1 : Group Motor Installation

Per NEC430-52 and -53, the combination with a specific rated Fuse or Circuit Breaker allows several motors in a circuit composition.
Fuji MMS are cUL listed per group installation regulations of NEC.
Two or more motors can be connected to one branch circuit when the MMS is used with a specific current rated branch circuit protection device (see remarks below).

The advantages of Group Installation are as follows.

- ***The number of components like Circuit Breakers can be reduced***
- ***The wire size can be reduced by 1/3 - 1/10 under certain conditions***
- ***The area inside the control panel can be minimized***



Remarks :
Per NEC regulations, to connect several motors on one branch circuit protection device, note the following conditions (A) or (B) or (C) and condition (D) listed NEC article 430.53 must be complied.
(A) : Not over 1 horsepower
(B) : If smallest rated motor protected
(C) : Other group installation
(D) : Single motor taps.
For complete details, please refer to NEC book.

Case study 2 : Self-Protected Combination Motor Controller / TYPE E and TYPE F

Fuji MMS are cUL listed as a Self-Protected Combination Controller such as Type E and Type F.
To apply MMS as Self-Protected Combination Controller, MMS must be attached to short circuit alarm contact block (**BZ0TKUAB**).
32A frame type, BM3R series must also be attached to the line side terminal cover (**BZ0TCRE**) because the Self-Protected Combination Controller has the clearance and creepage distance requirements as UL489 regulation.
(63A frame type, BM3V series complies with their regulation without terminal cover.)

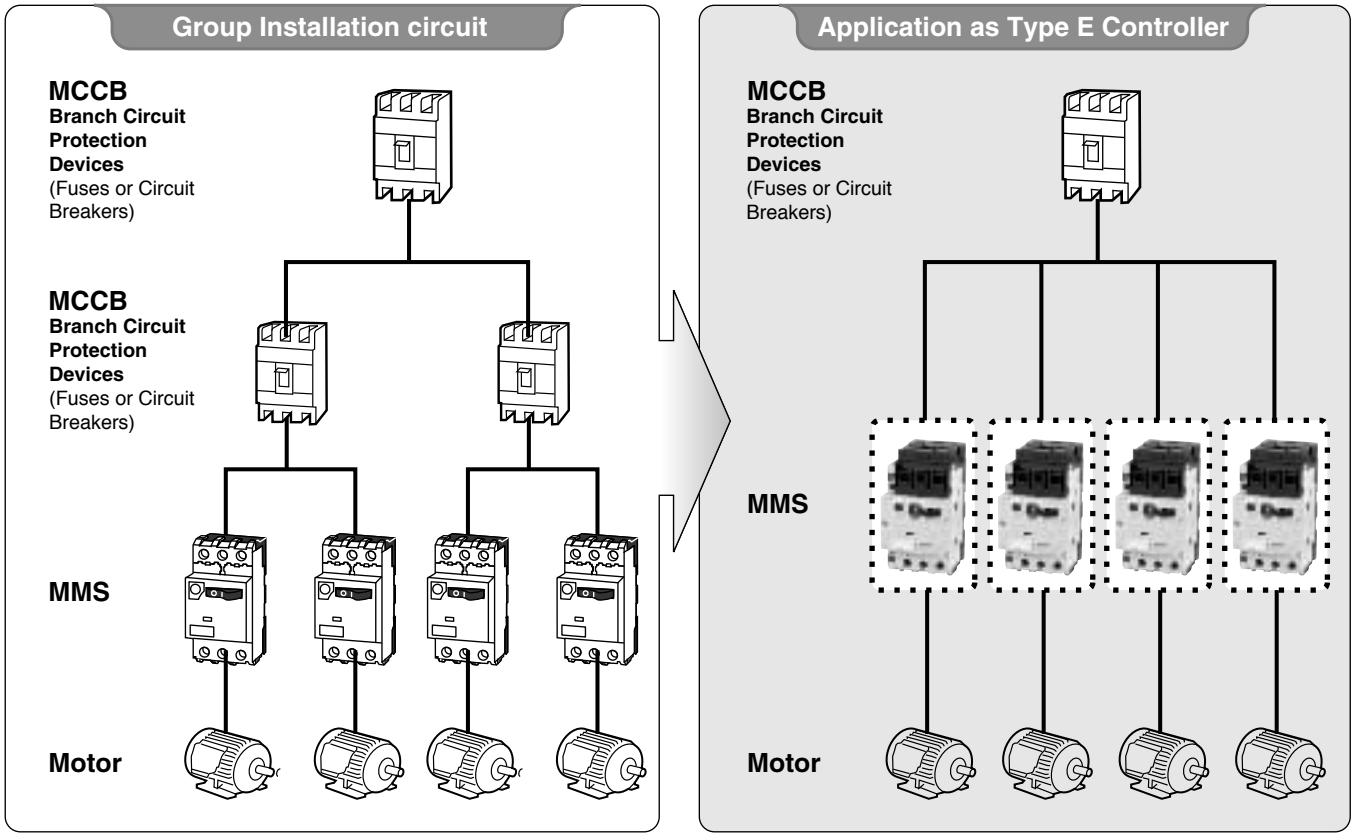
(1) Combination motor controller, **Type E**, when only MMS is used.
(Manual Self-Protected Combination Motor Controller according to UL508)

(2) Combination motor controller, **Type F**, when MMS is used with Fuji SC-E, SC-M contactor.
(Manual Self-Protected Combination Motor Controller + Magnetic contactor according to UL508)

The advantage of a Self-Protected Combination Motor Controller is that it can replace a **UL489 Circuit Breaker**.
This means that in a motor branch circuit, the UL489 Circuit Breaker upstream can be eliminated.
MMS has a trip function like a Circuit Breaker for the purpose of protection against short-circuit.
Therefore, the number of components can be reduced and will result in saving more space than the ordinary Group Installation.

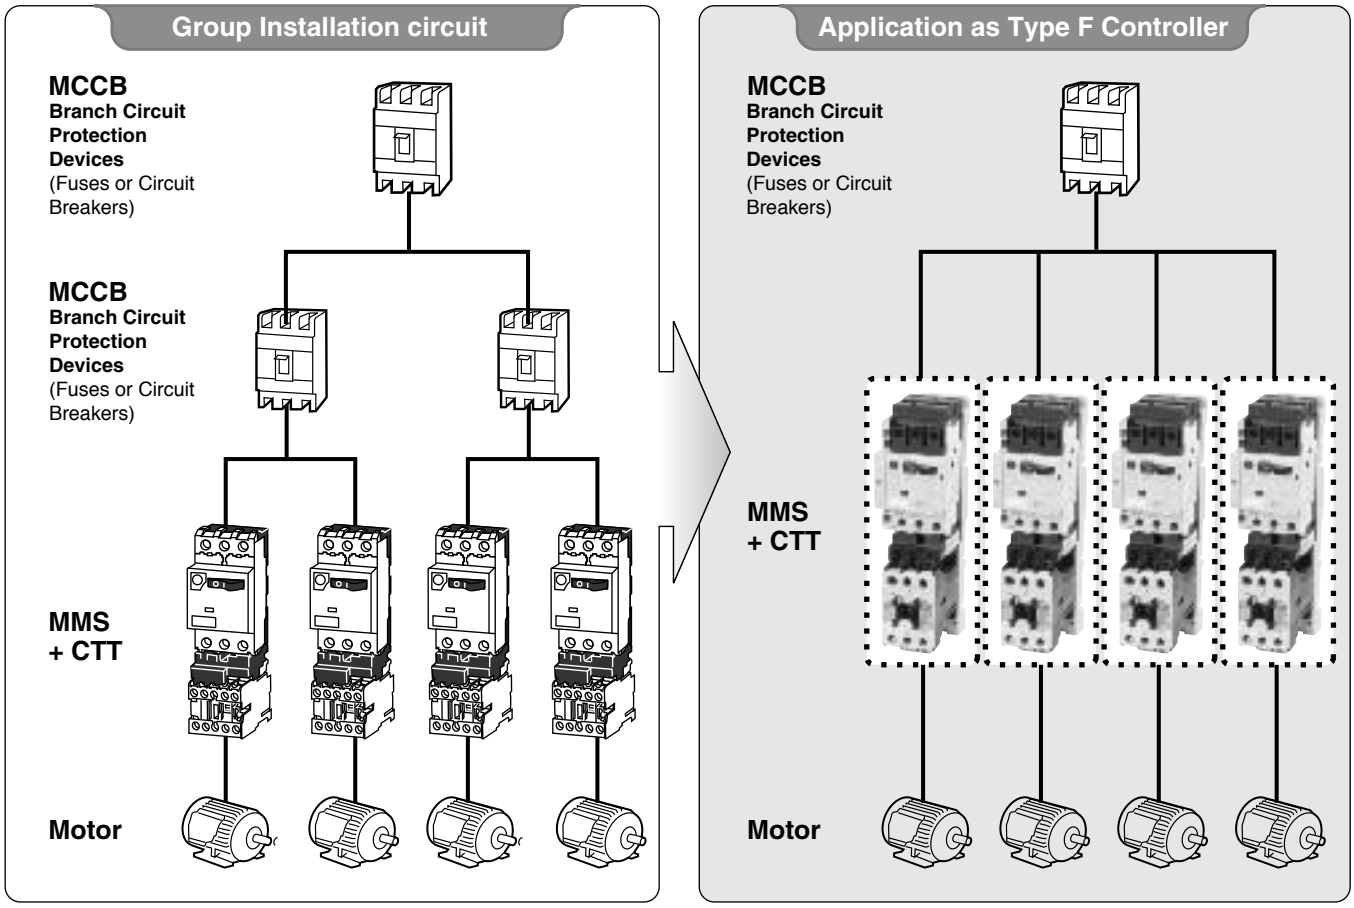
* The self-protected combination motor controller can be used as branch circuit protection in *Motor Circuit only*.
They cannot be applied to any other loads such as resistance load.

Example of Type E application



Requirements for Type E construction
- Terminal cover (BZ0TCRE) except for BM3V series.
- Short-circuit alarm contact block (BZ0TKUAB) for all MMS.

Example of Type F application



Requirements for Type F construction
- Must be used with contactor for motor control fuction.
- Terminal cover (BZ0TCRE) except for BM3V series.
- Short-circuit alarm contact block (BZ0TKUAB) for all MMS.

Case study 3 : Motor Disconnecting Means

Per NEC 430.102, a disconnecting means must be applied to each controller.
Fuji MMS are also cUL listed as **"Suitable as Motor disconnect"** and can be applied as a Motor disconnect.

The advantage of using MMS for disconnect means :

- An extra component will not be needed because the MMS has a dual function, which will lead to smaller space requirement and less components.

Ordering information

Specify the following:
1. Part number
2. Accessories if required

BM3 V H B - 063

Product category

Frame size
R: 32A Frame 45mm wide
V: 63A Frame 55mm wide

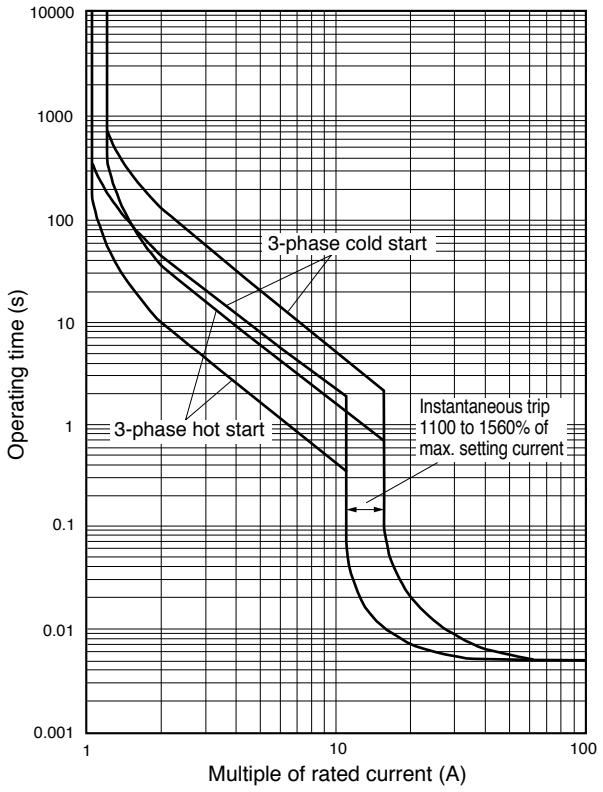
Rated current code (see page 9 to 12)

Operating characteristic
B: Adjustable thermal-magnetic trip

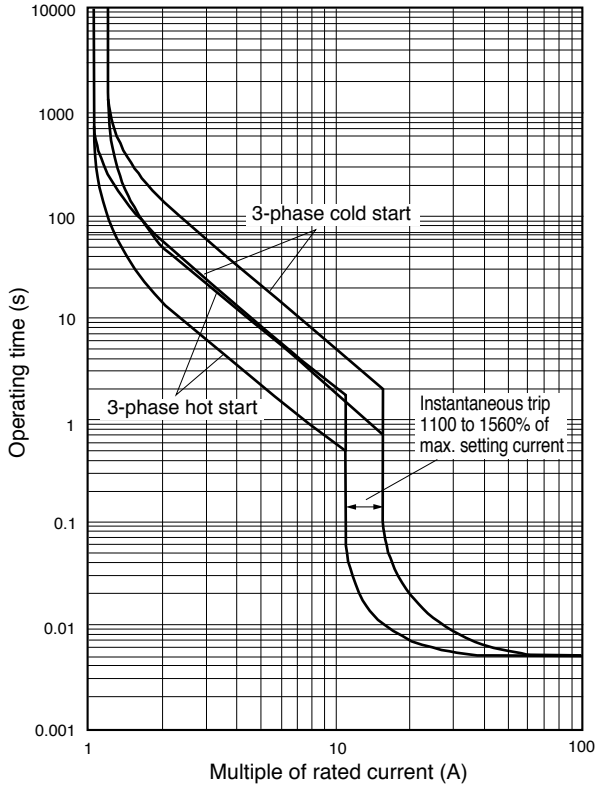
Breaking capacity
S: Standard breaking capacity
H: High breaking capacity

Characteristic curves

• BM3RSB, RHB



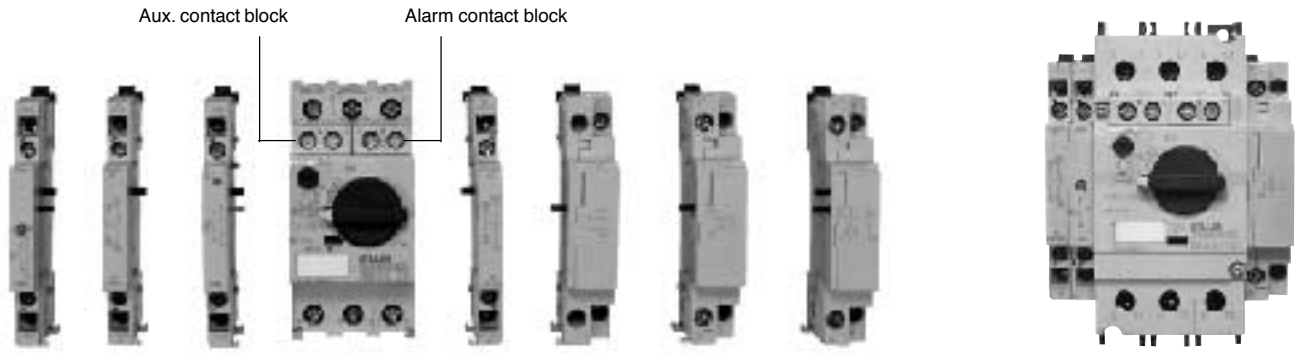
• BM3VSB, VHB



Manual Motor Starters
Optional accessories

Features

- All accessories can be used with BM3R (45mm wide) and BM3V (55mm wide) frames.
- Accessories are easily mounted.
- Internal auxiliary contact blocks and alarm contact blocks can be mounted on front side.
- External auxiliary contact blocks can be mounted on either the right or left side.
- Shunt trip and undervoltage trip devices are available in a wide range of operating voltages.
- Standard and emergency external handles are available.
- IP20 terminal cover prevents accidental contact to electrically charged parts.



Part number and ratings

• Auxiliary contact blocks (W)

Description		Starter type	Mounting	Contact arrangement	Part number	Mass (g)
 AF01-60L	These blocks are linked to the ON/OFF operation of the MMS. Up to two contact blocks can be mounted to the right/left front, and up to two contact blocks can be mounted to the right/left sides.	BM3R BM3V	Front	1NO 1NC	**BZ0WIA** **BZ0WIB**	9
			Left side	2NO 1NO+1NC 2NC	**BZ0WUAAL** **BZ0WUABL** **BZ0WUBBL**	45
 AF01-59, 01-58			Right side	2NO 1NO+1NC 2NC	**BZ0WUAAR** **BZ0WUABR** **BZ0WUBBR**	45

• Alarm contact blocks (K)

Description		Starter type	Mounting	Contact arrangement	Part number	Mass (g)
 AF01-60R	This block operates when the MMS trips due to overload, phase-loss, or short-circuit. It is not linked to the ON/OFF operation of the MMS. Note: Operation can be checked with the test trip function.	BM3R BM3V	Front (Right side only)	1NO 1NC	**BZ0KIA** **BZ0KIB**	9

• Auxiliary and alarm contact blocks (WK)

Description	Starter type	Mounting	Contact arrangement	Part number	Mass (g)
 AF01-57 • This contact block combines auxiliary contact and alarm contact that operate in the event of an overload, phase loss, or short-circuit. Alarm contact is not linked to the ON/OFF operation of the MMS. • An alarm is displayed in the contact block's indicator when the alarm contact operates. Note: Operation can be checked with the test trip function.	BM3R BM3V	Left	1NO (Aux.)+ 1NO (Alarm) 1NC (Aux.)+ 1NO (Alarm) 1NO (Aux.)+ 1NC (Alarm) 1NC (Aux.)+ 1NC (Alarm)	**BZ0WKUAA** **BZ0WKUBA** **BZ0WKUAB** **BZ0WKUBB**	45

• Short-circuit alarm contact block (KI)

Description	Starter type	Mounting	Contact arrangement	Part number	Mass (g)
 AF01-56 • The contacts operate only when the MMS has tripped due to a short-circuit. • When these contacts operate, the blue reset button extends out, and a trip indication is displayed. • The power to the MMS can be turned ON after pressing the reset button. Note: Operation can be checked with the test trip function. Be sure to press the reset button before mounting to the MMS.	BM3R BM3V	Left	1NO+1NC	**BZ0TKUAB**	45

• Shunt trip devices (F)

Description	Starter type	Mounting	Coil voltage	Part number	Mass (g)
This device is used to remotely trip the MMS.  AF01-55 Notes: • This device cannot be used together with an undervoltage trip device. • When the MMS has been tripped with the shunt trip device, press the reset button before turning ON the power.	BM3R BM3V	Right	24VAC 50/60Hz 48VAC 60Hz 48VAC 50Hz/60VAC 60Hz 100VAC 50Hz/100–110VAC 60Hz 110–127VAC 50Hz/120VAC 60Hz 200VAC 50Hz/200–220VAC 60Hz 220–230VAC 50Hz/240–260VAC 60Hz 240VAC 50Hz/277VAC 60Hz 380–400VAC 50Hz/400–440VAC 60Hz 415–440VAC 50Hz/460–480VAC 60Hz 500VAC 50Hz/600VAC 60Hz 24–60V DC * 110-240V DC *	**BZ0FAZU** **BZ0FBZU** **BZ0FCZU** **BZ0F1ZU** **BZ0FDZU** **BZ0FEZU** **BZ0FFZU** **BZ0FGZU** **BZ0FHZU** **BZ0F4ZU** **BZ0FJZU** **BZ0FKZUD** **BZ0FLZUD**	115

Note: * The time rating of coil is 5s.

• Undervoltage trip devices (R)

Description	Starter type	Mounting	Coil voltage	Part number	Mass (g)
R types This device automatically trips the MMS when the control circuit voltage drops below the specified value.  AF01-54 Notes: • This device cannot be used together with a shunt trip device. • When the MMS has been tripped with the undervoltage trip device, press the reset button before turning ON the power.	BM3R BM3V	Right	24VAC 50Hz 24VAC 60Hz 48VAC 50Hz 48VAC 60Hz 100VAC 50Hz/100–110VAC 60Hz 110–127VAC 50Hz/120VAC 60Hz 200VAC 50Hz/200–220VAC 60Hz 220–230VAC 50Hz/240–260VAC 60Hz 240VAC 50Hz/277VAC 60Hz 380–400VAC 50Hz/400–440VAC 60Hz 415–440VAC 50Hz/460–480VAC 60Hz 500VAC 50Hz/600VAC 60Hz	**BZ0RAZ1U** **BZ0RAZ2U** **BZ0RBZ1U** **BZ0RBZU** **BZ0R1ZU** **BZ0RDZU** **BZ0REZU** **BZ0RFZU** **BZ0RGZU** **BZ0RHZU** **BZ0R4ZU** **BZ0RJZU**	115

Manual Motor Starters
Optional accessories

• External operating handles

Description	Starter type	Handle type	Part number	Mass (g)
 KK02-305 • Used to operate an MMS installed inside a panel, from the outside of the panel. • Equipped with an interlock mechanism that prevents someone from mistakenly opening the panel door when the MMS is in the ON state. • The shaft can be cut to match the distance between the MMS and the panel door.	BM3RH	Standard (black) Emergency (red/yellow)	**BZ0VBBL** **BZ0VYRL**	160 160
 KK02-306 • Door interlock function • OFF lock function • Can be locked OFF with up to three padlocks. Note: Padlocks not included. • Release screw allows the door to be opened with the handle in the ON position. • IP54 enclosure	BM3V	Standard (black) Emergency (red/yellow)	**BZ0VBBM** **BZ0VYRM**	160 160

• Line side terminal cover

Description	Starter type	Part number	Mass (g)
 Used for making Type E or Type F condition	BM3R	**BZ0TCRE**	30

• Others

Description	Starter type	Part number	Mass (g)
Push-in lug  Used for screw mounting. 10 pcs/pack	BM3R	**BZ0SET**	2.0
Terminal cover for IP20  Prevents accidental contact to charged parts. 6 pcs/pack	BM3V	**BZ0TCV**	0.6
Dummy cover  KK02-39 • Used to cover the open space if an internally mounted accessory should become unnecessary. • Mounts to either the left-front or right-front position. • 10 pcs/pack	BM3R BM3V	**BZ0CFG**	1.4

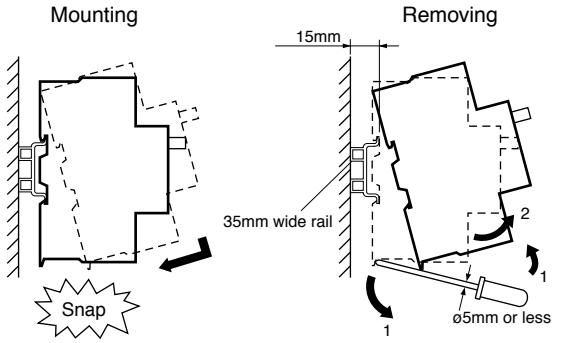
■ Standard operating conditions

Ambient temperature	Operating: –5 to +55°C Storage: –40 to +65°C	No sudden temperature changes resulting in condensation or icing.
Humidity	45 to 85%RH	
Altitude	2000m or lower	
Atmosphere	No excessive dust, smoke, corrosive gases, flammable gases, steam or salt.	
Vibration	10 to 55Hz 15m/s^2	No abnormal shock or vibration
Shock	50m/s^2	

■ Mountings

• Rail mounting

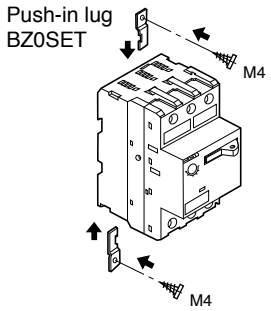
The MMS can be mounted to a 35mm DIN rail. Secure the rail with screws at mounting pitch of less than 400mm for the BM3R type and less than 300mm for the BM3V type.
Applicable rail:
Use a 15mm-high TH35-15 (FUJI model TH35-15AL) rail conforming to EN-50022 and IEC715.
The standard rail mounting direction is horizontal. When using the MMS on a vertically mounted rail, use FUJI end clamp kits.



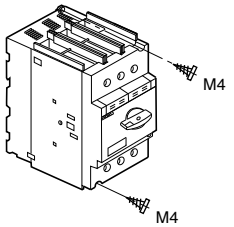
• Screw mounting

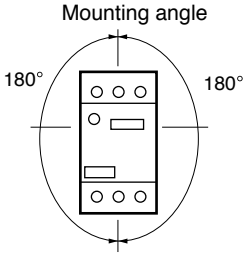
The separately sold push-in lug (BZ0SET) is required for screw mounting the BM3R frame. The BM3V frame can be screw mounted directly to the panel.

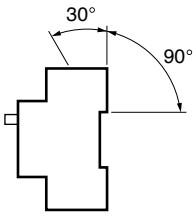
BM3RSB
BM3RHB



BM3VSB
BM3VHB



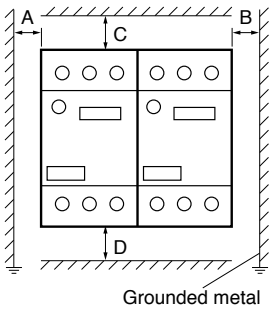




■ Arc space

The arc space required when mounting is shown in the table below.

Type	Rated operational voltage Ue (V)	Min. distance to grounded metal (mm) A, B	C, D
BM3RS	Up to 460	15	20
	500	15	30
	Up to 690	40	40
BM3RH	Up to 500	15	30
	Up to 690	40	50
BM3V	Up to 500	15	40
	Up to 690	40	50



When frames are mounted side-by-side, operating conditions such as a high ambient temperature or using the maximum setting for continuous current may cause slight changes in operating characteristics due to temperature rises.
Under such conditions, it is recommended that the frames be separated by at least 5mm.

■ Wirings

While pressing the wire with a screwdriver, tighten the screw to the specified tightening torque.

Type		BM3R	BM3V	BZ0 Accessories
Solid wire (mm)		ø1.6 to 2.6	ø1.6 to 2.6	ø1 to 1.6
Stranded wire (mm^2)	Single-wire	1 to 10	1 to 25	0.5 to 2.5
	2-wire	1 to 6	1 to 16	0.5 to 2.5
AWG	Single-wire	18 to 8	18 to 4	18 to 14
	2-wire	18 to 10	18 to 4	18 to 14
Sheath stripping length (mm) 		Approx.10	Approx.13	Approx.10
Terminal screw		Pan head screw (PZ2) M4	Pan head screw (PZ2) M6	Pan head screw (PZ2) M3.5
Tightening torque (N·m)		2	4	0.8

Note: There is no need for a crimp terminal or any other terminal on the end of the connection wire.

Features

- The busbar system reduces wiring time and saves floorspace.
- The busbar makes it easy to power from 2 to 5 manual motor starters – with no wiring needed.
- The 3-phase feed-in terminals are used to connect the wire for the power supply circuit.
- The busbar cover guards against accidental contact with non-connected busbar terminals (charged parts).

<Note>
If using BZ0TCRE terminal cover with BM3R series MMS, the busbar system can not be used.

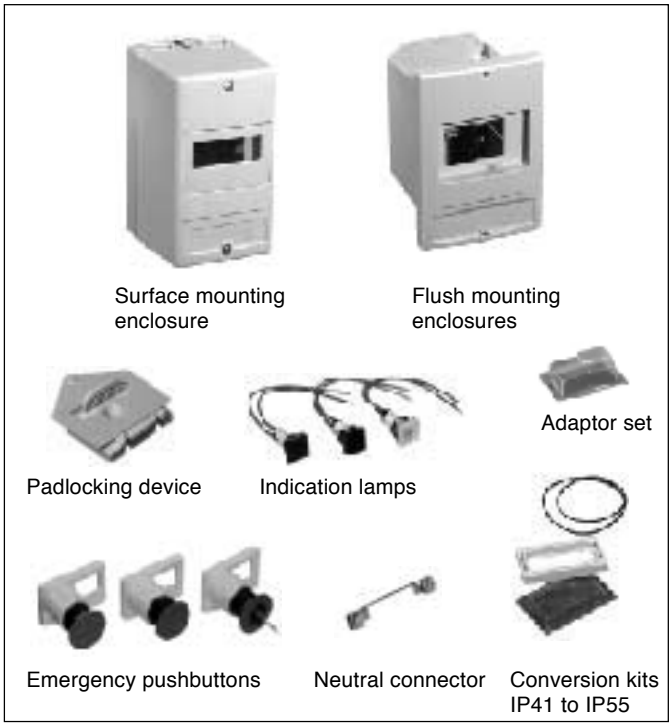
Manual Motor Starters
Enclosures

Features

- Accommodates a variety of manual motor starters (BM3RSB-P16 to 025). Put the manual motor starter inside an enclosure for use in harsh environments. Surface mounting and flush mounting types available.
- IP41 and IP55 enclosure protection degree available.
- Manual motor starters (BM3RSB-P16 to 025) equipped with internal accessories and the following external accessories can be used inside an enclosure.
  Left side: One auxiliary contact block (W) or one auxiliary and alarm contact block (WK)
  Right side: One shunt trip device (F) or one undervoltage trip device (R)
- A wide variety of enclosure accessories are available. Padlocking device, emergency mushroom head pushbutton, conversion kit, and indicator lamps.



Part number and ratings

Enclosures for BM3RSB-P16 to 025

Mounting	Specification	Part number	Mass (g)
Surface	IP41	**BZ0CSLA**	320
	IP55 (with conversion kit)	**BZ0CSLB**	340
Flush	IP41	**BZ0CFLA**	240
	IP55 (with conversion kit)	**BZ0CFLB**	260

Accessories for enclosures

Description	Specification	Part number	Mass (g)
Padlocking device	OFF locking possible using up to three padlocks with a 5 to 8mm shackle diameter.	**BZ0CKA**	90
Emergency pushbutton	Momentary	**BZ0CPM**	55
	Push-lock turn reset	**BZ0CPL**	55
	Key operated	**BZ0CPK**	90
Conversion kit	Converts IP41 to IP55	**BZ0CCA**	25
Adaptor set	For BM3RS + undervoltage trip device with auxiliary contact.	**BZ0CUA**	20
Neutral connector	Used inside the enclosure for neutral and ground connection.	**BZ0CNA**	10
Indication lamp	Green, 100–120V AC	**BZ0CLGA**	15
	Green, 200–240V AC	**BZ0CLGB**	15
	Green, 380–440V AC	**BZ0CLGC**	15
	Green, 480–500V AC	**BZ0CLGD**	15
	Green, 500–600V AC	**BZ0CLGE**	15
	Red, 100–120V AC	**BZ0CLRA**	15
	Red, 200–240V AC	**BZ0CLRB**	15
	Red, 380–440V AC	**BZ0CLRC**	15
	Red, 480–500V AC	**BZ0CLRD**	15
	Red, 500–600V AC	**BZ0CLRE**	15
	White, 100–120V AC	**BZ0CLCA**	15
	White, 200–240V AC	**BZ0CLCB**	15
	White, 380–440V AC	**BZ0CLCC**	15
	White, 480–500V AC	**BZ0CLCD**	15
	White, 500–600V AC	**BZ0CLCE**	15

Notes: • The padlocking device cannot be used together with the emergency pushbutton or undervoltage trip device with auxiliary contact.
• The emergency pushbutton cannot be used together with the undervoltage trip device with auxiliary contact.

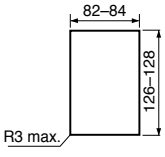
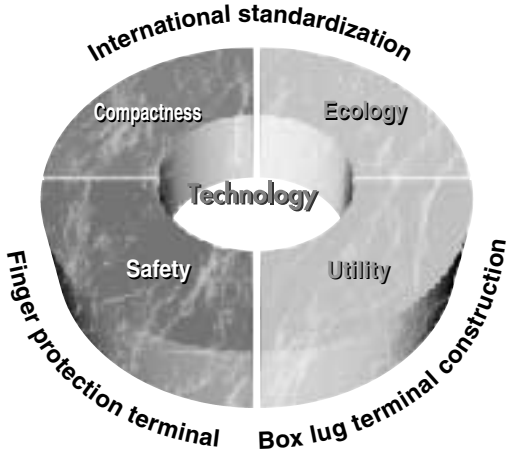
Panel cutting



3 to 100HP at 480V AC
The SC-M and SC-E series further enhance the high reliability of the SC series with full conformance to International standards.

In addition to the five basic concepts of the existing SC series magnetic contactors and motor starters — international standardization, compactness, safety, utility, and ecology — the SC-M and SC-E series take the line-up to the next step in utility with a new finger protection terminal and box lug terminal construction.



International standardization
IEC 60947-4-1, EN 60947-4-1, VDE 0660
UL 508, CSA C 22.2, JIS C 8201-4-1
[Approved cUL (File No. E42419, E44592),
TÜV (R2018010, R2150072, R50013402)]

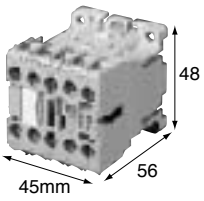
Compactness
- SC-M01, M02: 45mm wide
  SC-E02 to E05: 43mm wide, SC-E1 to E2S: 54mm wide
  SC-E3, E4: 67mm wide, SC-E5: 88mm wide
  SC-E6: 100mm wide, SC-E7: 115mm wide
- Reducing mounting area

Safety
- Terminals with finger-touch protection (DIN 57106/ VDE 0106 Teil100)

Utility
- Box lug terminal construction
- Long electrical life
- Reduction of wiring work

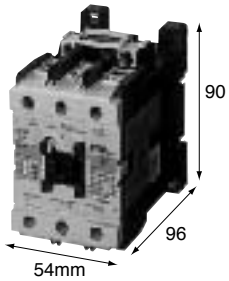
Ecology
- Reducing power consumption
- Recycled thermoplastic resin used for plastic parts.
- The names of materials are indicated on all major parts to facilitate their recycling.

SC-M series

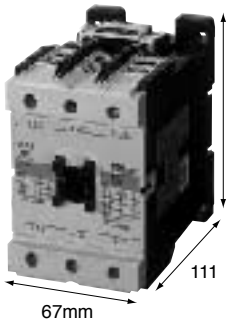


SC-M01, M02

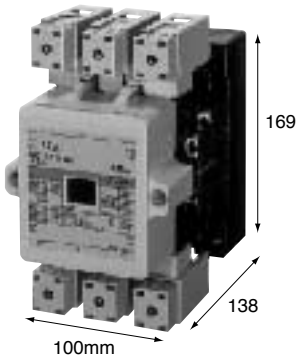
SC-E series



SC-E1 to E2S



SC-E3, E4



SC-E6 with SUPER magnet

Contactors SC-M and SC-E series
Ordering information and Characteristics

■ Ordering information

Specify the following :
1. Part number
2. Operating coil voltage code
3. Auxiliary contact arrangement (SC-M series only)

SC-M 01 /G - 24VAC - 1NO

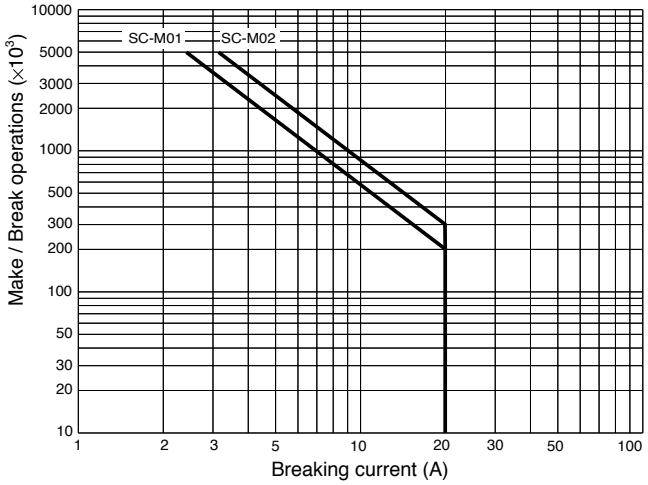
- **Product category**
- **Frame size**
- **AC coil operating: None**
  DC coil operating: /G
- **Operating coil voltage code** (see page 34)
- **Aux. contact arrangement** 1NO or 1NC required

SC-E 02 /G - 24VAC

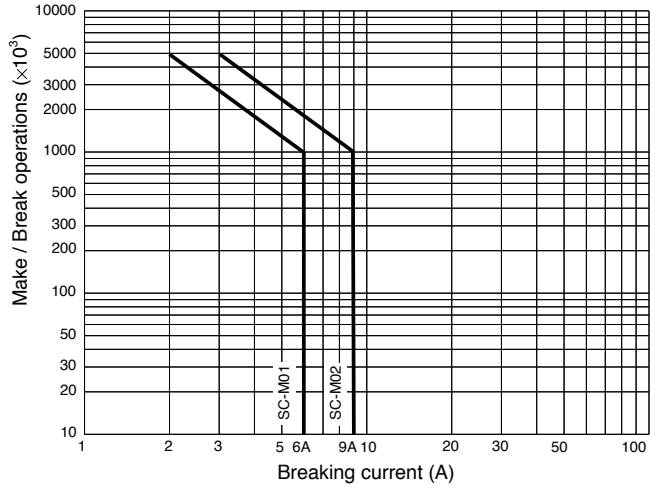
- **Product category**
- **Frame size**
- **AC coil operating: None**
  DC coil operating: /G
- **Operating coil voltage code** (see page 34)

■ Electrical durability

• AC-1 duty / 380 to 440 V AC / SC-M

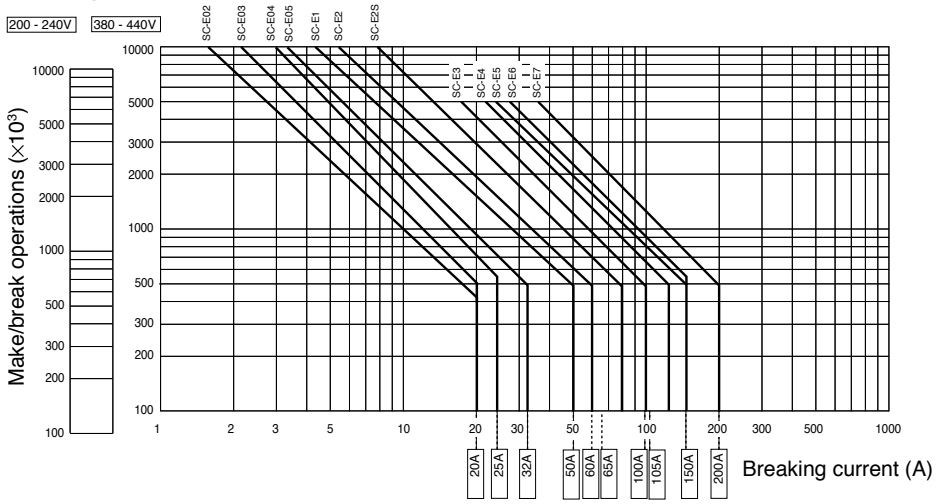


• AC-3 duty / 380 to 440 V AC / SC-M

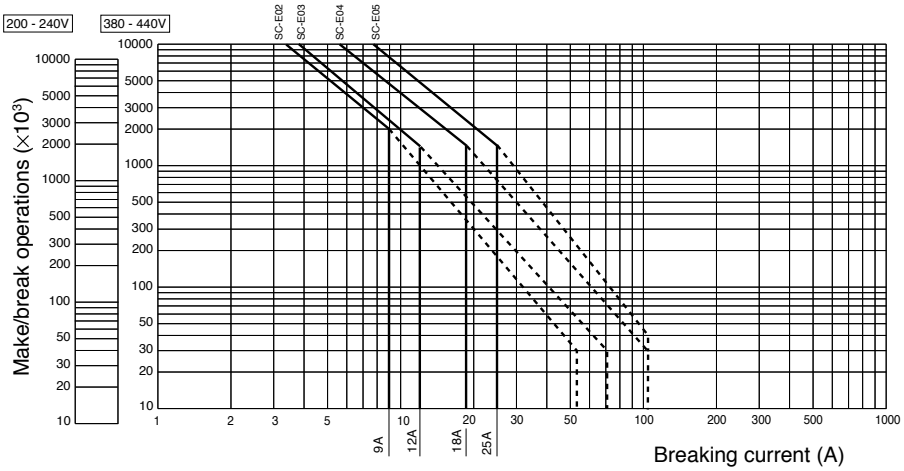


■ Electrical durability

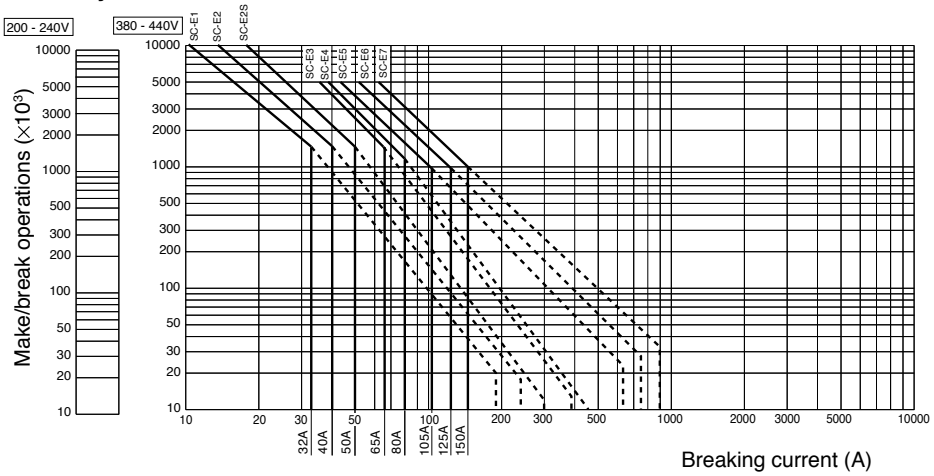
• AC-1 duty / SC-E02 to SC-E7



• AC-3 duty / SC-E02 to SC-E05



• AC-3 duty / SC-E1 to SC-E7



Contactors SC-M and SC-E series

■ Standard operating conditions

The magnetic contactors are manufactured for use in the standard operating conditions given in the table at the right. Consult FUJI before using the magnetic contactors in different conditions.

Ambient temperature	Operating: –5 to 55˚C No sudden temperature changes resulting in condensation or icing (The average temperature over a 24-hour period must not exceed 35˚C) Storage: –40 to 65˚C
Humidity	45 to 85%RH
Altitude	2000m or lower
Atmosphere	No excessive dust, smoke, corrosive gases, flammable gases, steam, or salt
Vibration	10 to 55Hz 15m/s^2
Shock	50m/s^2
Mounting	Screw mounting, 35mm DIN rail mounting (SC-E02 to SC-E4)
Mounting angle	
Standard	IEC 60947-4-1, EN 60947-4-1, VDE 0660 JIS C 8201-4-1, JEM 1038 UL 508, CSA C22.2

■ Wirings

• Connection wires and terminal processing

Be sure to perform wiring correctly with reference to the connections diagram. Main terminals for models SC-E02 to SC-E7 are wired using solid wires or stranded wires. Stranded wires or flexible stranded wires can be connected by twisting them together, crimping a sleeve (ferrule) onto them before connecting.

• Tightening torque

If wires are not tightened sufficiently, they may become hot or come loose and result in a fire, short-circuit, electric shock, or some other potentially dangerous situation. Be sure to tighten the wires to the torques specified in the tables below.

• Connectable wire sizes, tightening tools, tightening torques

Main circuit

Contactor type		SC-E02 SC-E02/G	SC-E03 SC-E03/G	SC-E04 SC-E04/G	SC-E05 SC-E05/G
Solid wire (mm^2)	One	0.75 to 4		0.75 to 6	
	Two	1 to 4		1.5 to 6	
Stranded wire (mm^2)	One	0.75 to 4		0.75 to 6	
	Two	1 to 4		1.5 to 6	
AWG	One	12 max.		10 max.	
	Two	12 max.		10 max.	
Sheath stripping length (mm)					
Terminal screw size		M4			
Tool		⊕Phillips screwdriver, H-type, No. 2 (ISO 8764) ⊖Flat-blade screwdriver, 1×5.5×L-type, B (ISO 2830)			
Tightening torque (N·m)		1.2 to 1.5			

Control circuit

Solid or stranded wire (mm^2)	One	0.75 to 2.5 (ø1 to 1.6)
	Two	0.75 to 2.5

	Flexible stranded wire with sleeve (mm^2) *1		0.75 to 16	1.5 to 35	2.5 to 50	2.5 to 95
	Flexible stranded wire without sleeve (mm^2) *1		0.75 to 16	1.5 to 35	4 to 50	4 to 95
	AWG		18 to 3	16 to 1/0	12 to 2/0	12 to 250MCM
	Sheath stripping length (mm) 		12.5	16	26.5	28.5
Top/bottom connection	Solid or stranded wire (mm^2) *1	Top/bottom	0.75 to 25	1.5 to 50	4 to 70	4 to 120
	Flexible stranded wire with sleeve (mm^2) *1	Top/bottom	0.75 to 16	1.5 to 35	2.5 to 50	2.5 to 95
	Flexible stranded wire without sleeve (mm^2) *1	Top/bottom	0.75 to 16	1.5 to 35	4 to 50	4 to 95
	AWG	Top/bottom	18 to 3	16 to 1/0	12 to 2/0	12 to 250MCM
Tool			⊕Phillips screwdriver, H-type, No. 2 (ISO 8764) ⊖Flat-blade screwdriver, 1×5.5×L-type, B (ISO 2830)	◎Hex. wrench 4 (ISO 2936)		
Tightening torque (N·m)			2.5	8		10
Self-locking torque (N·m) *2			1	2		

Notes: *1 Stranded wire (0 to 25mm^2) consists of 7 wires or less.
Stranded wire (35 to 120mm^2) consists of 19 wires or less.
Flexible stranded wire consists of more number wires than the above.

*2 The tightening bolt must be loosened in order to insert the wire. However, stop loosening the bolt when the anti-drop attachment on the bottom of the bolt reaches the top edge of the terminal. If a torque exceeding that given in the table is applied in this state, the retaining bracket may come loose.

Thermal overload relays TK-E series
Quick reference guide and Ordering information

TK-E series with open-phase protection device

Features

- This relay protects motor windings from burning due to overloads, locked rotor current, or open-phases.
- Maintenance and inspection safety has been improved by employing a finger protection mechanism to cover exposed terminals (conforms to DIN 57106, VDE 0106 Teil 100).
- A high-precision scale for the current adjustment dial enables easy and exact current setting.
- The operating status can be visually checked with ease.
- The relays can be manually tripped. A trip-free mechanism is also provided.
- Base unit can be added to enable separate-mounting types of the TK-E02, E2, and E3 models.

Thermal overload relays TK-E series
Optional accessories

■ Optional accessories for TK-E series

• Base units for separate mounting

The base unit modifies thermal overload relays to separate mounting that can be mounted to 35mm-wide IEC top hat rail or secured with screws.

Applicable thermal overload relay	Type
TK-E02	**SZ-HCE**
TK-E2	**SZ-HDE**
TK-E3	**SZ-HEE**

• Trip indicator

Reports any tripping action at a thermal overload relay through its LED display.

Applicable thermal overload relay	Rated voltage	Type
TK-E02	100–110V AC, 50/60Hz	**SZ-L100**
	200–220V AC, 50/60Hz	**SZ-L200**
TK-E2 to TK-E6	100–110V AC, 50/60Hz	**SZ-L100N2**
	200–220V AC, 50/60Hz	**SZ-L200N2**

• Reset release button

Reset a thermal overload relay from the rear side of the board or a distant location.

Applicable thermal overload relay	Load length (mm)	Type
TK-E02	300	**SZ-R1**
	500	**SZ-R2**
	700	**SZ-R3**
TK-E2 to TK-E6	300	**SZ-R4**
	500	**SZ-R5**
	700	**SZ-R6**

• Dial cover

Protects the setting current value of a thermal overload relay from being changed unintentionally.

Applicable thermal overload relay	Type
TK-E02 to TK-E6	**SZ-DA**

■ Standard operating conditions

The thermal overload relays are manufactured for use in the standard operating conditions given in the table at the right. Consult FUJI before using the thermal overload in different conditions.

Ambient temperature	Operating: –5 to 55˚C No sudden temperature changes resulting in condensation or icing (The average temperature over a 24-hour period must not exceed 35˚C) Storage: –40 to 65˚C
Humidity	45 to 85%RH
Atmosphere	No excessive dust, smoke, corrosive gases, flammable gases, steam, or salt
Vibration	10 to 55Hz 15m/s^2
Shock	50m/s^2

■ Wiring

• Connection wires and terminal processing

Be sure to perform wiring correctly referring to the connection diagram. Main terminals for models TK-E02 to TK-E6 are wired using solid wires or stranded wires. Stranded wires or flexible stranded wires can be connected by twisting them together crimping a sleeve (ferrule) onto them before connecting.

• Tightening torque

If wires are not tightened sufficiently, they may become hot or come loose and result in a fire, short-circuit, electric shock, or some other potentially dangerous situation. Be sure to tighten the wires to the torques specified in the tables below.

• Wire sizes, tightening tools, tightening torques

Main circuit

Thermal overload relay type		**TK-E02**
Base unit type		SZ-HCE
Solid wire (mm^2)	One	0.75 to 4
	Two	1 to 4
Stranded wire (mm^2)	One	0.75 to 4
	Two	1 to 4
AWG	One	12 max.
	Two	12 max.
Sheath stripping length (mm)		11
Terminal screw size		M4
Tool		⊕Phillips screwdriver, H-type, No. 2 (ISO 8764) ⊖Flat-blade screwdriver, 1×5.5×L-type, B (ISO 2830)
Tightening torque [N·m(lb·in)]		1.2 to 1.5 (11 to 13)

Control circuit

Single stranded wire (mm^2)	One	0.75 to 2.5 (ø1 to ø1.6)
	Two	0.75 to 2.5
AWG	One	18 to 14
	Two	18 to 14
Sheath stripping length (mm)		10
Fork terminal		Max. 7.7mm wide (R2-3.5)
Terminal screw size		M3.5
Tool		⊕Phillips screwdriver, H-type, No. 2 (ISO 8764) ⊖Flat-blade screwdriver, 1×5.5×L-type, B (ISO 2830)
Tightening torque [N·m(lb·in)]		0.8 to 1 (7 to 9)

Thermal overload relay type		**TK-E2**	**TK-E3**	**TK-E5**	**TK-E6, E6H**
Base unit type		SZ-HDE	SZ-HEE	–	–
	Single stranded wire (mm^2) *1	0.75 to 16	1.5 to 35		16 to 70
	Flexible stranded wire with sleeve (mm^2) *1	0.75 to 16	1.5 to 35		16 to 70
	Flexible stranded wire without sleeve (mm^2)	0.75 to 16	1.5 to 35		16 to 70
	AWG	6 max.	2 max.		00 max.
	Sheath stripping length (mm) 	18	21		23
	Tool	⊕Phillips screwdriver, H-type, No. 2 (ISO 8764) ⊖Flat-blade screwdriver, 1×5.5×L-type, B (ISO 2830)	◎Hex. wrench 4 (ISO 2936)		
	Tightening torque (N·m)	2.5	6		10

Notes: *1 Stranded wire (0 to 25mm^2) consists of 7 wires or less.
Stranded wire (35 to 120mm^2) consists of 19 wires or less.
Flexible stranded wire consists of more number wires than the above.

Combination Starters
Quick reference guide

Features
- The user can assemble a combination starter by combining a BM3 series manual motor starter and an SC series magnetic contactor according to the load motor capacity.
- The manual motor starter provides overload, phase-loss, and short-circuit protections for the motor circuit, and incorporates a dial for flexible adjustment to match the total load current of the motor.
- The magnetic contactor allows remote ON/OFF operation of the motor circuit with high frequency, and features a electrical durability of one million operations.
- The manual motor starter and magnetic contactor are connected via link module and mounted to a base plate.

To make an application for Type F condition, You need to prepare BZ0TKUAB accessories separately.

■ Optional accessories

• Link modules

Description	Applicable MMS	Applicable magnetic contactor	Operating coil	Type	Mass (g)
 (No.KK01-153) The link module connects the manual motor starter and magnetic contactor electrically and mechanically.	BM3R	SC-M01, M02	AC	**BZ0LRC09AA**	25
		SC-M01/G, M02/G	DC	**BZ0LRC09AA**	25

• Base plates

Description	Applicable MMS	Applicable magnetic contactor	Operating coil	Type	Mass (g)
 (No.KK01-155) The base plate is a plastic plate to which the combination starter is mounted. The base plate can then be mounted to a panel with screws or to a DIN rail.	BM3R	SC-E02, E03, E04, E05	AC	**BZ0BPRE22A**	100
		SC-E02/G, E03/G, E04/G, E05/G	DC	**BZ0BPRE22A**	100
		SC-E1	AC	**BZ0BPRE32A**	160

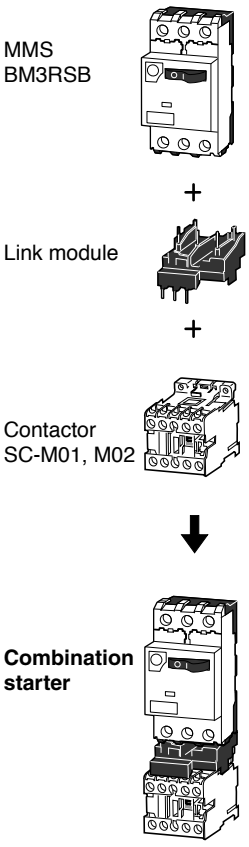
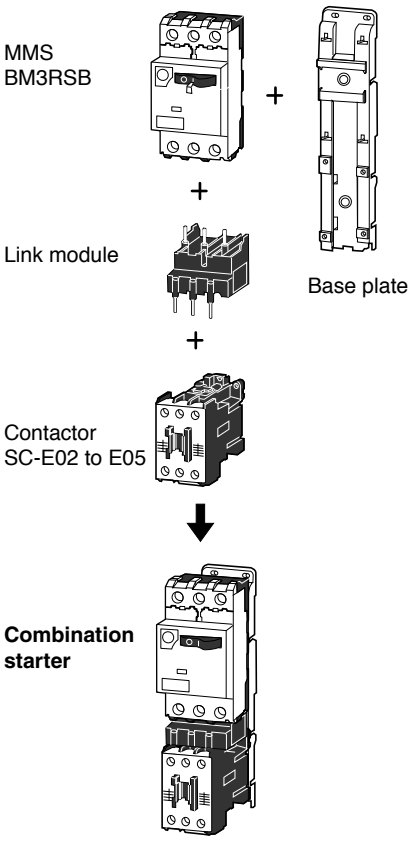
		SC-E3	AC	**BZ0BPVE65A**	195
		SC-E3/G	DC	**BZ0BPVE65A**	195

■ Combination starter configurations

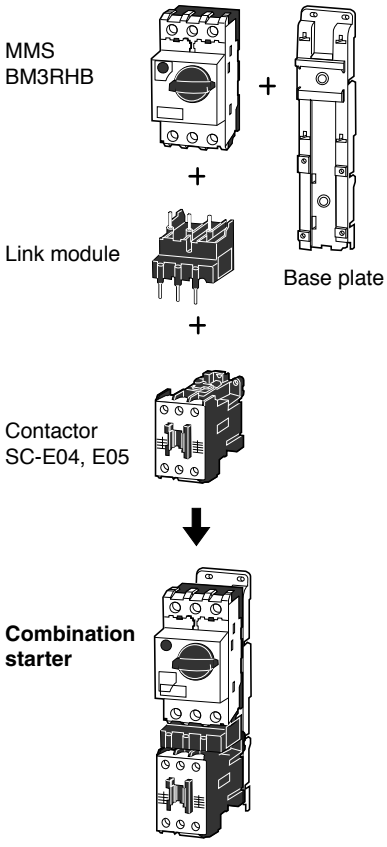
• BM3RSB+SC-M01, M02



• BM3RSB+SC-E02 to E05

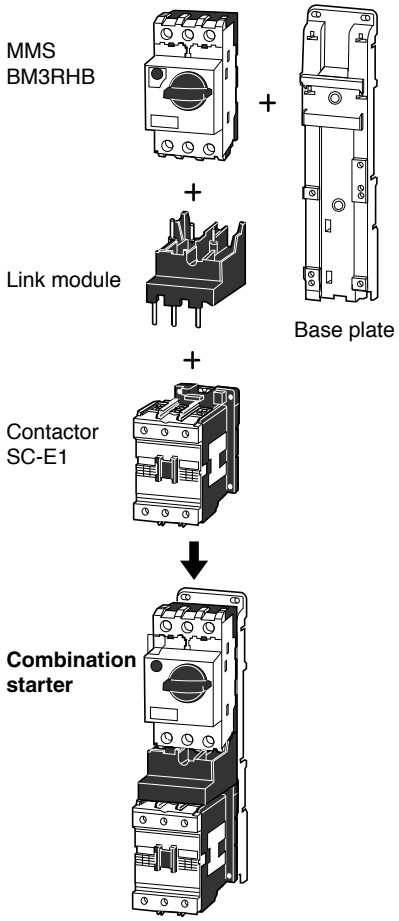


• BM3RHB+SC-E04, E05

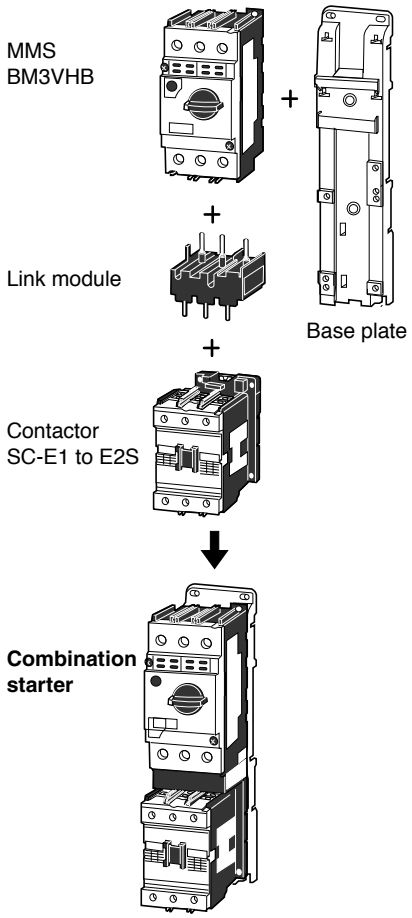


Combination Starters
Optional accessories

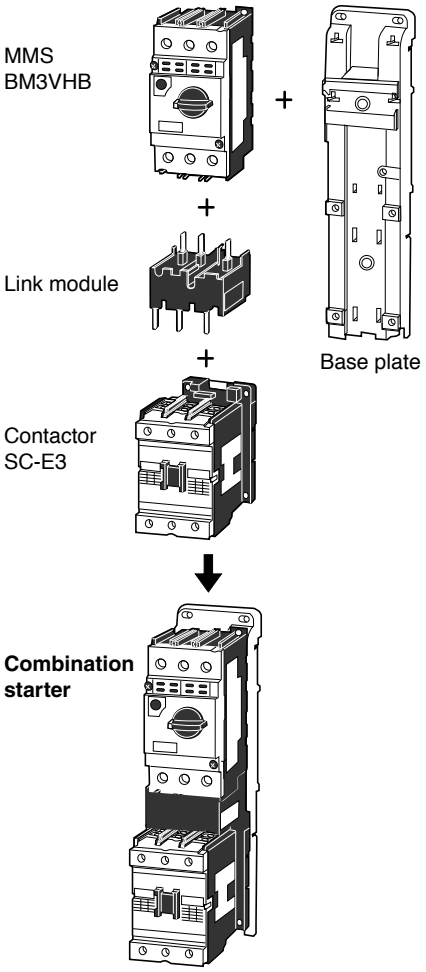
• BM3RHB+SC-E1



• BM3VHB+SC-E1 to E2S



• BM3VHB+SC-E3

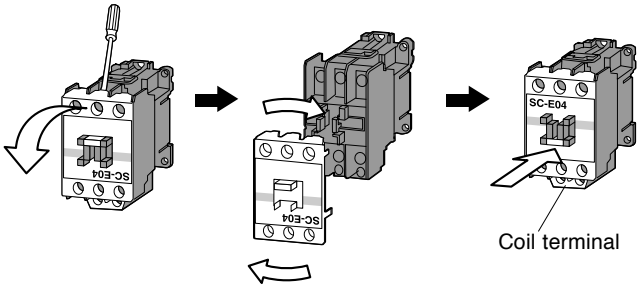


■ Notes for mounting an MMS and contactor

When the manual motor starter and magnetic contactor are configured as a combination starter, the nameplate ends up facing the wrong direction because the coil terminal of the magnetic contactor faces downward. Use the following procedure to turn the nameplate upside down.

For SC-E02 to SC-E05 magnetic contactors

- Insert a flat-blade screwdriver between the arc-chamber of the S phase or V phase and the terminal screw, and lift the arc-chamber to remove it.
- After removing the cover, turn the cover 180 degrees (top to bottom), then re-mount it onto the magnetic contactor.
- Align the cover with the top and bottom terminals and press it on firmly by hand.



For SC-E1 to SC-E3 magnetic contactors

- Use a Phillips screwdriver to remove the two screws securing the front and back bodies.
- Remove the front body and turn it 180 degrees (top to bottom), then re-mount it with the screws.
- Make sure that no foreign matter enters the interior of the magnetic contactor during this removal and re-mounting procedure.

SZ-Z34	Coil surge suppression unit CR type 24-48VAC/DC for SC-E1 to SC-E4	D1	23.00
SZ-Z35	Coil surge suppression unit CR type 100-250VAC/DC for SC-E1 to SC-E4	D1	23.00
SZ-Z36	Coil surge suppression unit CR type 24-48VAC/DC for SC-E1/G to SC-E4/G	D1	23.00
SZ-Z37	Coil surge suppression unit CR type 100-250VAC/DC for SC-E1/G to SC-E4/G	D1	23.00
Power connection kit for reversing			
SZ-MRWC	Power connection kit for reversing line side and load side for SC-M01(/G), SC-M02(/G)	D14	18.00
SZ-ERW1/A	Power connection kit for reversing line side for SC-E02(/G) to SC-E05(/G)	D14	10.00
SZ-ERW1/B	Power connection kit for reversing load side for Reversing Contactor SC-E02(/G) to SC-E05(/G)	D14	10.00
SZ-ERW1/D	Power connection kit for reversing load side for Reversing Motor Starter SC-E02(/G) to SC-E05(/G)	D14	10.00
SZ-ERW2/A	Power connection kit for reversing line side for SC-E1(/G) to SC-E2S(/G)	D14	20.00
SZ-ERW2/B	Power connection kit for reversing load side for Reversing Contactor SC-E1(/G) to SC-E2S(/G)	D14	20.00
SZ-ERW2/D	Power connection kit for reversing load side for Reversing Motor Starter SC-E1(/G) to SC-E2S(/G)	D14	20.00
SZ-ERW3/A	Power connection kit for reversing line side for SC-E3(/G) to SC-E4(/G)	D14	40.00
SZ-ERW3/B	Power connection kit for reversing load side for Reversing Contactor SC-E3(/G) to SC-E4(/G)	D14	40.00
SZ-ERW3/D	Power connection kit for reversing load side for Reversing Motor Starter SC-E3(/G) to SC-E4(/G)	D14	40.00
Mechanical interlock unit			
SZ-MRM	Mechanical interlock unit for SC-M01(/G), SC-M02(/G)	D14	4.00
SZ-RM	Mechanical interlock unit for SC-E02(/G) to SC-E4(/G)	D1	20.00
Replacement coil			
4NC0H-#MC	Replacement coil for SC-E02 to SC-E05 (# : operating coil voltage code)	D1	30.00
SZ-GM/N1-#	Replacement coil for SC-E1 to SC-E2S (# : operating coil voltage code)	D1	30.00
SZ-GM/N2S-#	Replacement coil for SC-E3 to SC-E4 (# : operating coil voltage code)	D1	31.00
SZ-GS/N5-#	Replacement coil for SC-E5 (# : operating coil voltage code)	D1	250.00
SZ-GS/N6-#	Replacement coil for SC-E6 to SC-E7 (# : operating coil voltage code)	D1	276.00
Base unit for separate mounting			
SZ-HCE	Separate mounting base unit for TK-E02	D14	10.00
SZ-HDE	Separate mounting base unit for TK-E2	D14	20.00
SZ-HEE	Separate mounting base unit for TK-E3	D14	25.00
Trip indicator			
SZ-L100	Trip indicator 100-110VAC for TK-E02	D1	15.00
SZ-L200	Trip indicator 200-220VAC for TK-E02	D1	15.00
SZ-L100N2	Trip indicator 100-110VAC for TK-E2 to TK-E6	D1	15.00
SZ-L200N2	Trip indicator 100-110VAC for TK-E2 to TK-E6	D1	15.00
Reset release button			
SZ-R1	Reset release button 300mm for TK-E02	D1	96.00
SZ-R2	Reset release button 500mm for TK-E02	D1	112.00
SZ-R3	Reset release button 700mm for TK-E02	D1	127.00
SZ-R4	Reset release button 300mm for TK-E2 to TK-E6	D1	100.00
SZ-R5	Reset release button 500mm for TK-E2 to TK-E6	D1	120.00
SZ-R6	Reset release button 700mm for TK-E2 to TK-E6	D1	135.00
Dial cover			
SZ-DA	Dial cover for TK-E02 to TK-E6	D1	2.00

BZ0BPRE32A	Base plate for BM3R and SC-E1(/G)	D14	24.00
BZ0BPVE51A	Base plate for BM3V and SC-E1(/G) to SC-E2S(/G)	D14	26.00
BZ0BPVE65A	Base plate for BM3V and SC-E3(/G)	D14	30.00

Appendix 1 : Construction of combination motor controllers

The UL508 standard defines 6 categories depending on the construction type for the combination motor controllers. The type and component function is shown below.

Type	Component	Component standard	Component funciton per NEC			
			Disconnect	Branch circuit protection	Motor control	Motor overload
A	Manual disconnect	UL98,UL1087	X			
	Fuse	UL248		X		
	Magnetic	UL508			X	
	Overload relay	UL508				X
B	Manual disconnect	UL98,UL1087	X			
	Motor short-circuit Protector	UL508		X		
	Magnetic	UL508			X	
	Overload relay	UL508				X
C	Inverse time Circuit Breaker	UL489	X	X		
	Magnetic	UL508			X	
	Overload relay	UL508				X
D	Instantaneous Circuit Breaker	UL489	X	X		
	Magnetic	UL508			X	
	Overload relay	UL508				X
E	Self-Protected control device	UL508	X	X	X	X
F	Manual Self-protected combination motor controller	UL508	X	X		X
	Magnetic	UL508			X	

Fuji MMS is indicated on the label with "Manual Self-Protected Combination Motor Controller" (TYPE E) and "Combination Motor Controller" (TYPE F).

Appendix 2 : Short circuit coordination comparison

UL508 (Part IV, Combination Motor Controllers) and IEC60947-4-1 are the two major standards concerning the combination of the MMS and the Contactor. In IEC60947-4-1, it only regulates the short-circuit protective coordination between the Contactor and the Circuit Breaker. However, in UL508, it takes the combination of the MMS and Contactor as a united component and requires additional performances besides the short-circuit test.
UL standard is available for another standard related short circuit coordination, that is **UL subject 508E**.
(IEC type "2" Coordination Short Circuit Tests of Electromagnetic Motor Controllers in accordance with IEC Publication 947-4-1)
UL subject 508E is to certify that the coordination between the MMS and Contactor comply with IEC60947-4-1 type 2 requirements.
Fuji combination Starters are also cUL listed UL subject 508E, which means that it comforms to both UL and IEC regulation for short-circuit coordination.

Test	UL508 Type F	IEC60947-4-1		UL subject 508E
		Type 1	Type 2	
Short-Circuit Coordination	X - The contactor may be damaged - It may not be suitable for further service without repair or replacement.	X - The contactor may be damaged - It may not be suitable for further service without repair or replacement.	X - No damage except light welding of the contacts of the contactor. - It shall be suitable for further use.	X - No damage except light welding of the contacts of the contactor. - It shall be suitable for further use.
Current withstand	X	-	-	-
Dielectric voltage withstand	X	X	X	X
Calibration	X	-	X	X
Temperature	X	-	-	-
Effective region	North America	Europe	Europe	North America

Coordination details between MMS and Contactor as UL508 Type F, please see page 56, 57, as UL subject 508E, please see page 79, 80.

• BM3RSB, BM3RHB (UL subject E coordination)

■ TERMS AND CONDITIONS OF SALE

Prices
All prices are subject to change without notice. In the event of a price change, the effective date of the change will be the date on the new price or discount schedule sheet.
All quotations made or orders accepted after the effective date will be based on the new prices.

Quotations
Written quotations are valid for 30 days from its date unless otherwise stated in the quotation. Verbal quotations expire the same day they are made.

Taxes
The price does not include any taxes. Buyer shall be responsible for the payment of all applicable taxes.

Terms of payment
Terms of payment will be listed on the quotations.

Minimum orders
Orders amounting to less than $150.00 net per order will be charged a $50.00 handling fee.

Delivery
Delivery of products shall be FOB point of origin in the U.S. Seller shall determine the point of origin of shipment. All shipping and other charges shall be paid by Buyer.

Packing
Prices include standard domestic packing. Additional special packing costs required for export or by Buyer's request will be charged to Buyer.

Weight and Dimensions
The weight and dimensions of products described in this catalog are the best information available at the time of going to press. As Seller follows a policy of continuous product improvement, design changes may make this information obsolete. Information in this catalog is subject to change without notice.

Inspection and acceptance of products
Buyer is responsible for evaluating received products for final acceptance. All claims for shortage must be made within thirty (30) days of receipt of products.

Return / Cancellation
No product shall be returned or canceled unless return/order cancel authorization has been secured from Seller. All returns/cancellations must comply with Seller's then current Return / Cancellation policy.

Risk of Loss
Risk of loss or damage to the product shall pass to Buyer at the FOB point.

Catalog Disclaimer
The information contained in this catalog does not constitute an express or implied warranty of quality, any warranty of merchantability of fitness for a particular purpose is hereby disclaimed.
Since the Buyer's product information, specific use application, and conditions of use are all outside of Seller's control, it shall be the responsibility of the Buyer to determine the suitability of any of the products mentioned for the Buyer's application.

ONE YEAR LIMITED WARRANTY

The products identified in this catalog shall be sold pursuant to the terms and conditions identified in the Conditions of Sale issued by Fuji Electric with each order confirmation. Except to the extent otherwise provided for in the Conditions of Sale issued by Fuji Electric, Fuji Electric warrants that the Fuji Electric products identified in this catalog shall be free from significant defects in materials and workmanship provided the products have not been: (1) repaired or altered by others than Fuji Electric; (2) subjected to negligence, accident, misuse, or damage by circumstances beyond Fuji Electric's control; (3) improperly operated, maintained or stored; or (4) used in other than normal use or service. This warranty shall apply only to defects appearing within one (1) year from the date of shipment by Fuji Electric, and in such case, only if such defects are reported to Fuji Electric within thirty (30) days of discovery by purchaser.

Such notice should be submitted in writing to Fuji Electric at Park 80 West, Plaza II, Saddle Brook, NJ 07663. The sole and exclusive remedy with respect to the above warranty whether such claim is based on warranty, contract, negligence, strict liability or any other theory, is limited to the repair or replacement of such product or, at Fuji Electric's option, reimbursement by Fuji Electric of the purchase price paid to Fuji Electric for the particular product. ***FUJI ELECTRIC DOES NOT MAKE ANY OTHER REPRESENTATIONS OR WARRANTIES, WHETHER ORAL OR IN WRITING, EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTY REGARDING MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.***

Except as provided in the Conditions of Sale, no agent or representative of Fuji Electric is authorized to modify the terms of this Warranty in writing or orally.

In no event shall Fuji Electric be liable for special, indirect or consequential damages, including but not limited to, loss of use of the product, other equipment, plant, power system, loss of profits or revenues, cost of capital, or claims against the purchaser or user by its customers resulting from the use of information, recommendations and descriptions contained herein. Purchaser agrees to pass on to its customers and users, in writing at the time inquiries and orders are received by buyer, Fuji Electric's warranty as set forth above.
