

Mini PushPull ix Industrial®

Pushing Performance

Description

HARTING is pleased to announce the new Mini PushPull ix Industrial®. The new Mini PushPull represents the waterproof and dustproof version of the ix Industrial® Gbit Ethernet Interface. With a 30 % shorter housing compared to the proven HARTING PushPull RJ45, users benefit from a miniaturized data interface for demanding applications.

Links to Other Materials

Specs

- IP 65/67
- Suitable for 10 Gbit/s Ethernet / Cat 6A
- 360° shielding
- Cable diameter 4.5-7.5 mm
- AWG 26-28 (10 poles) stranded
- Optical indicators for mating orientation
- Integrated “Security Clip” in yellow color avoids unwanted operation

Markets

- Automation
- Machinery & Robotics
- Transportation
- Energy

Applications

- Small Drives
- Vibratory Conveyors
- Control Terminals
- Passenger Information & Entertainment Systems
- Wireless Access Points
- Cameras
- Connections Inside Cabinets

Feature

- Mini PushPull IP 65/67
- 30% shorter compared to the RJ45 PushPull variant
- Visual identification via yellow tab of mating orientation

Advantages & Benefits

- Provides a high reliable connection even under high shock and vibration conditions
- Provides a compact and dense solution within environments where space constraint is a challenge
- Provides time saving during installation and deployment on the field
