★★★★★ **Greatest button on the market!**

about a year ago by [noahspylife](#) ✓ verified purchaser

This small button packs in a VERY BRIGHT indicator led, which can be controlled separately from a microcontroller. VERY HELPFUL with custom builds. They feature a built-in resistor for the led, and it has a great mechanical build quality, and its click is very professional and industrial feeling.

I recommend you buy this product!

★★★★★ **Works so well**

about 8 months ago by [Member #403410](#) ✓ verified purchaser

I was rewiring a replica-car (52 MGTD on a VW chassis) and needed a pushbutton to control the hi-lo headlight relay and indicate high beam.. I added a 1k ohm resistor to reduce the LED brightness output somewhat

In 2003, CU student Nate Seidle blew a power supply in his dorm room and, in lieu of a way to order easy replacements, decided to start his own company. Since then, SparkFun has been committed to sustainably helping our world achieve electronics literacy from our headquarters in Boulder, Colorado.

No matter your vision, SparkFun's products and resources are designed to make the world of electronics more accessible. In addition to over 2,000 open source components and widgets, SparkFun offers curriculum, training and online tutorials designed to help demystify the wonderful world of embedded electronics. We're here to help you start something.
